

**APPENDABLE SYSTEM AND DEVICES FOR DATA ACQUISITION,  
ANALYSIS AND CONTROL**

**ABSTRACT OF THE DISCLOSURE**

An appendable system includes a plurality of appendable devices that are adapted to interoperate with each other and/or a workstation via a communication network to monitor and/or control a process. Each of the appendable devices can communicate with one or more sensors and/or control outputs and includes a housing that facilitates mounting of the appendable device to a surface.
